

XM radio provides an extremely valuable service to me. They provide the information to me that I need to make my life easier, safer and more enjoyable. While traveling in many different cities When driving I know exactly where I need to go to get the information I need to make good, safe decisions. When visiting new cities it's almost impossible to find which station is broadcasting the information you need. I understand the need for local stations to protect their financial interests but it's not in the best interest of the consumer. I am asking you to please reject NAB petition 04-160. The alternative to satellite radio would be for me to get a wireless link to the internet and try and access information over the internet while driving - that will not be nearly as safe as XM radio.
